PROFESSIONAL SUMMARY

Experienced developer with over seven years in the industry, specializing in full-stack development, blockchain technologies, and responsive web design.
I have a proven ability to collaborate effectively with teams, step up to address challenges, and consistently deliver high-quality solutions. With over three years of focused experience in frontend development, I bring expertise in creating responsive websites while leveraging a passion for personal growth and continuous learning.

My track record includes improving system performance, leading successful projects, and working closely with cross-functional teams. I am eager to contribute my skills to a talented engineering team, applying my dedication to coding and innovative problem-solving to develop impactful and reliable software solutions.
